*Consult with experts in most of the technology/domains at Skills Ahead.*

## TRAINING & CONSULTANCY SOLUTIONS THAT PRODUCE RESULTS

India Skills Report 2014, a joint initiative by Confederation of Indian Industry (CII), PeopleStrong and Wheebox says that with manpower of 1.2437 billion, it is ironic that we suffer from dearth of talent. As per recent studies, the severity of the situation can be estimated; only 10% of MBA graduates of the country are employable and same is true for the engineering graduates where this number is as low as 17%. This scarcity of skilled talent makes it impossible for the Talent Supply Chain to operate effectively and is an issue which, if not taken care of immediately will become uncontrollable. One can imagine the enormity of the challenge we will face, when in year 2026, 64.8% of India's population would be in the working age group of 15-64 years.

Solving this problem requires true-blue participation from all actors of the Talent Supply Chain: the Academia, the Industry and the Government. The first step towards any such partnership is a better understanding amongst partners: the needs, expectations and the challenges of each other. Only then can any plan and bridge the gaps.

**Skills Ahead's** capacity to bridge that gap is derived from the decades of experience in technology industry. It has the capability to create technology leaders.

College students to working professionals have appreciated Skills Ahead's methodology of Technology mentoring worldwide, and have achieved the success they have defined for themselves.

To be professionally successful on technical knowledge front you need to be equipped with latest upgraders into the specific technology domains. You need to build strong foundation and then reach to the excellence.

**Skills Ahead®** helps you to achieve that excellence in each activity you do.
